The BRAND® Titrette® bottletop burette makes routine titrations faster, easier and more accurate. The Titrette® avoids the risk of spills from poured transfers to glass or plastic burettes, eliminates meniscus reading errors and offers accuracy that satisfies the tolerances for Class A glass burettes. The instrument is well suited for general chemistry, water treatment applications, food/beverage analysis, industrial titrations, and environmental work in the lab or field.

• **High Accuracy:** Precise titrations within the error limits of Class A glass burettes.

• **Smooth Operation:** Mechanism fills and titrates smoothly and easily, for exceptionally sensitive drop-wise titrations.

• **Compact Design:** The Titrette® operates in a fixed position on top of titrant bottles. The low-profile design is more stable and fits readily under shelves and cabinets.

• **Easy Handling:** The Titrette® switches automatically between filling and titrating modes. The titrating tube adjusts vertically and horizontally to match receiving vessels, and operation is cordless, using economical commercial batteries that are protected from corrosive vapors.

• **Simple Maintenance:** The Titrette® can be disassembled for cleaning, ensuring long, reliable service even with crystallizing titrants. Easy Calibration™ technology simplifies ISO/GLP compliance.

• **Special Options:** Amber windows (included) protect light-sensitive reagents. Optional drying tube protects moisture-sensitive titrants.

• **PC Interface:** Models available with direct data transmission to PC.

Visit www.brandtech.com for more details.

Class A precision

The Titrette® bottletop burette has an innovative measuring system which matches the Class A accuracy of glass burettes and, if needed, can display 3 decimal places for volumes below 20 mL. This is an important feature for users who need to work within the Class A error limits of glass burettes according to DIN EN ISO 385 or within the volumetric tolerances per ASTM E287.
Chemical Applicability

The Titrette® is suitable for use with the following titrating agents up to a concentration of 1 mol/L

Acetic acid
Alcoholic potassium hydroxide solution
Ammonium iron (II) sulfate solution
Ammonium thiocyanate solution
Barium chloride solution
Bromide bromate solution
Cerium (IV) sulfate solution
EDTA solution
Hydrochloric acid
Hydrochloric acid in acetone
Iodide iodate solution *
Iodine solution *
Iron (II) sulfate solution
Nitric acid

Oxalic acid solution
Perchloric acid
Perchloric acid in glacial acetic acid
Potassium bromate solution
Potassium dichromate solution
Potassium hydroxide solution
Potassium iodate solution
Potassium permanganate solution *
Potassium thiocyanate solution
Silver nitrate solution *
Sodium arsenite solution
Sodium carbonate solution
Sodium chloride solution
Sodium hydroxide solution
Sodium nitrite solution
Sodium thiosulfate solution
Sulfuric acid
Triethanolamine in acetone *
Zinc sulfate solution

This partial list reflects testing completed prior to publication of this flyer. For information on reagents not listed, please contact us.

* Use lightshield inspection window

* Error limits related to the nominal capacity
( = maximum volume) indicated on the instrument, obtained when instrument and distilled water are equilibrated at ambient temperature (20° C / 68° F) and with smooth operation.

** Error limit: EL = A + 2 CV

A* = Accuracy, CV* = Coefficient of Variation The maximum resolution of the display: The titration volume is displayed in steps of 1 µL for instruments with 10 mL and 25 mL size and in steps of 2 µL for 50 mL size instruments. For titration volumes above 20 mL, the display will automatically switch to steps of 10 µL.

PC interface (optional)
